

Mipa P 118 Ultra

Mipa P 118 Ultra is a self-levelling 2K polyester lightweight body filler of low viscosity to even dents and irregularities in car repairs. It is characterized by its very smooth surface without pores which allows skipping the application of fine putty.

- Pore-free finish
- Perfect transitions in the edge zones of the filler surface
- Short drying time and sandable with high abrasion
- No sagging of the filler
- Adhesion to iron, steel, aluminium, galvanised substrates, GRP and wood
